

STOCKPKG METALLIZED BAGS & FILM

Our products are manufactured to meet the unique requirements for your application. Metallized bags and films have a **vibrant and reflective silver surface** which reduces the permeability of the film to light, water and oxygen. Additional benefits of this product include higher toughness, **excellent moisture barriers**, the ability to be heat sealed, **great bonds to inks & adhesives**, and an increased radiant heat insulating value compared to standard polyethylene bags and films. Experience the difference with StockPKG Films!
